

POWER

WEST TORONTO

Power to Move, Power to Grow.

Hydro One, together with Toronto Hydro, is making significant upgrades to its electricity infrastructure to provide adequate and reliable power to the west end of Toronto. Power West Toronto is required to strengthen the city's electricity system, accommodate the growing needs of homes and businesses in Toronto, and is required to electrify the Eglinton Crosstown LRT.

The project involves installing new electrical equipment at Hydro One's existing Runnymede Transformer Station, located at 99 Woolner Avenue, which will require expanding the current station footprint. This is part of a larger effort which also includes upgrading 10 km of the existing overhead transmission line extending from the station.

Construction activities will be completed in stages, with work at Runnymede TS scheduled to begin in June 2017. In order to complete our work safely, construction activities may temporarily restrict access to recreational spaces and walkways along the corridor.

We know construction can be disruptive and we are committed to mitigating this as best we can. To ensure the community knows what to expect throughout the duration of the project, we invite you to attend our Community Information Centre to learn more about the project, ask questions and meet the project team.

COMMUNITY INFORMATION CENTRE

Join us:

Date: Tuesday, May 30, 2017

Time: 7:00 p.m. - 9:00 p.m.

Location: Rockcliffe Middle School,
Gymnasium
400 Rockcliffe Blvd.
