## **Community Notice**

### **You are invited to a community workshop**

Hydro One, together with Toronto Hydro, is making significant upgrades to its electricity infrastructure to provide adequate and reliable power to the west end of Toronto. Power West Toronto is required to strengthen the city's electricity system, accommodate the growing needs of homes and businesses in Toronto and is required to electrify the Eglinton Crosstown LRT.

The project will involve installing new equipment, including two new transformers to Hydro One's existing Runnymede Transformer Station located at 99 Woolner Avenue, which will require expanding the current station footprint. This is part of a larger effort which also includes upgrading 10 km of the existing overhead transmission line extending from the station.

### **Improving the Corridor**

In September, Councillor Nunziata facilitated a meeting with Hydro One and members of the community to discuss opportunities to improve the corridor for community use.

As a next step, Hydro One and Councillor Nunziata would like to meet with the community to further discuss and explore the improvement options and initiatives.

### **Join us:**

**Date:** November 27, 2017

**Time:** 7p.m. -9 p.m.

**Location:** David Appleton Centre, 33 Pritchard Ave

We look forward to seeing you there.
